

Attendance: Kevin, Andrew

Date: 10/31/2023

Meeting 1

Call to Order: 5:07PM, Andrew Seconds

Platform Definition: Underlying Technology, including Blockchain, infra. That is used to build & operate the cryptocurrency.

Blockchain Tech

Software Development Environment

Consensus Mechanisms

Network Infrastructure

Security Features

Smart Contracts & DApps

Consensus Rules & Governance

Privacy & Data Handling

Integration & interoperability

Some common Platforms:

Ethereum

Binance Smart Chain (BSC)

EOS

TRON

Stellar

NEO

Tezos

Cardano

Avalanche

Waves

Algorand

NEM

Qtum

Because of the requirement of a fiat type of currency, we would need to find a platform that can monitor and centralize around a regulatory structure. This would help us in our quest to provide adequate anti-laundering measures for our currency. Centralization is the anthesis to most cryptocurrencies already in existence.

Meeting Adjourned: 5:31, Andrew Seconds
